

Margarita Potato Vine

Plant with 'Blackie' Potato vine and Wave Petunias for a stunning contrast in shape and shade.

Ipomea batatas 'Margarita'

- **Use:** Our interest in these Sweet Potatoes is not in the edible roots but in the attractive foliage of our two ornamental varieties. Their large and colorful leaves cascade from containers in a seemingly endless stream all summer long, and their trailing habit makes them equally useful as striking, short-term ground covers or as skirts for upright plants.
- **Exposure/Soil:** Plants thrive in full sun or partial shade with consistent moisture. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Super fast grower trails only 3" tall and unlimited outward growth.
- **Hardiness:** 9-10 ; Annual in this zone unless you dig up the potatoes and store them in the garage over winter.
- **Foliage:** Bright chartreuse leaves that lean to gold in sun, pale green in partial shade. They measure 8in long by 6 wide, reach 6-9in tall, and are vaguely heart shaped.
- **Flower:** Not very noticeable flowers.
