

# Misty Lilac Wave Petunia

## *Petunia 'Wave Misty Lilac'*

- **Use:** Petunia Wave® has taken the gardening world by storm since its introduction a few years ago. Its spreading habit is just stunning, covering ground at the rate of several inches every single day, and trailing lots of big, colorful blooms as it goes! Misty Lilac is a change of pace from the hot pink tones of the other Waves--it offers soft color rippled with white tones. (Try it alongside new Blue for unbelievable color contrast!) Great for use in containers, flowerbeds, and large landscapes. Loved by hummingbirds.
- **Exposure/Soil:** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results.
- **Growth:** Densely-branched, it reaches about 6 inches tall and spreads 3 to 4 feet wide before you can turn around!
- **Hardiness:** Zone 8-11 Annual; Many people have success with them re-seeding and coming back every year.
- **Foliage:** Deciduous. Pinch back tips occasionally for a super bushy plant.
- **Flower:** The color is the only gentle thing about this plant, though--Misty Lilac has the same incredible bloom and spread of the other Waves!
