

Salvia Victoria Blue flat

Salvia farinacea 'Victoria Blue'

- **Use:** One of the most floriferous sources of deep violet-blue color for the summer garden, Victoria is treasured for its large, vividly-colored spikes, arising in great numbers all summer long on compact 18-inch plants. Especially effective in a mass planting, Victoria is an excellent choice for difficult dry spots, sunny meadowlands, and even in the gritty soil along fences and other "trouble spots" in the garden. It combines well with other summer-blooming annuals, adding much-valued blue tones to the garden.
- **Exposure/Soil:** Not fussy about soil, it flourishes in blazing sun to dappled shade, tolerating heat, drought, and other vagaries of the weather.
- **Growth:** Full, well branched plants grow 12-18" tall. Plant 4-6" apart.
- **Hardiness:** 9-11 Annual Heat tolerant.
- **Foliage:** Fragrant, green leaves. Pinch back tips and old flowers occasionally for a super bushy plant.
- **Flower:** Deep Violet-Blue Spikes are Unsurpassed for Quantity and Intensity!

**Tolerates heat,
drought, and virtually
any soil!**
