

Concerto Tulip

- Planting density: 4-6 inch apart, 5 per sq. ft.
- Planting depth: 6-8 inches to base of the bulb.
- Best planted in a mass of 20 or more for dramatic effect.

Tulipa 'Concerto' (Fosteriana type)

- **Use:** A harmony in white and cream colors. This dwarf, early flowering tulip is quite able to re-flower even if you don't lift the bulbs during dormancy. Long lasting blooms and easy growth requirements make this tulip a winner. Beds, rock gardens, in patio planters, and woodland gardens. For a show-stopping attraction in your garden, plant tulips in a group of 30 to 60.
- **Exposure/Soil:** Full-part sun (does best with some afternoon shade). Moist, well-drained soil, but not soggy. Place a layer of mulch over the bulbs in summer to keep cool and remove again in the fall.
- **Growth:** Grows 12-16" tall.
- **Hardiness:** Zone 3-8 Perennial Bulb
- **Foliage:** Deciduous. Long strap-like leaves.
- **Flower:** Sulphur white inside and out with a yellow edged black heart; an extremely beautiful and highly functional color because it will blend with just about any other color.
