

Black Mission Fig

Nothing compares to the incredibly soft texture and sweetness of a fresh fig, but dried figs can be just as delightful. By drying your figs, you'll vastly increase their shelf life and get to enjoy them through the entire year. Just imagine your family's delight when you serve figs, cranberries and honey at the next Thanksgiving.

Ficus carica 'Black Mission'

- **Use:** The sweet taste and incredible texture of the Black Mission Fig make it highly desirable. Rather than spend money buying figs from the supermarket, invest in your own Black Mission Fig tree. ***Please be sure to read the Home Garden Figs article from UGA on our Plant Information Page on the website.***
- **Exposure/Soil:** Grow in full sun. Well-drained, rich soil. pH of 5.5 to 6.5 necessary.
- **Growth:** They can grow up to 15-20 feet tall if not pruned. Plant 10-15' apart.
- **Hardiness:** 6-10; Tree.
- **Foliage:** Deciduous. . Do not prune mature Celeste trees heavily because this can reduce the crop.
- **Flower/ Fruit:** . Enjoy figs twice a year with the Black Mission Fig. Your tree will produce luscious fruit in the early spring and early fall. You'll get tons of sweet, soft fruit each year with your tree. Being one of the most abundant fig trees around, the Black Mission Fig will give you more fruit than you can imagine.
