

Cascade Hops

Humulus lupulus 'Cascade'

- **Use:** Cascade was the first widely grown American-bred aroma hop with a relatively low bittering value. It is one of the most popular hops for craft brewing and is great for dry hopping. Released in 1972, it is a cross between Fuggle and the Russian hop, Serebrianka. The compact medium sized cone has a moderate amount of light yellow lupulin that develops in unique tight balls in the cone. Good for picking, drying and baling. Alpha acid 4.5-7%.
- **Exposure/Soil:** Full sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** Plants can grow 2'ft tall and wide.
- **Hardiness:** zone 3-9; Perennial; Vine
- **Foliage:** Deciduous; Dark green deeply lobed foliage.
- **Flower/Fruit:** Flowers are papery green. Blooms late summer through early fall.
