

2.8 cu ft PRO-MIX with Mycorise

Use to plant trees, shrubs, perennials, annuals, and houseplants. Its blend allows optimum water drainage and air exchange far superior to cheap soils (mostly bark) sold at other stores. New and not in other soils on market mycorrhize helps break down food for the plants! Contains both a biofungicide to prevent root diseases and a mycorrhizal inoculum for plant growth enhancement.

BIOFUNGICIDE™ suppresses the root disease-causing organisms Pythium, Fusarium and Rhizoctonia that can attack plant's root systems. Includes a beneficial microscopic fungi that colonizes root systems to benefit plants by increasing water and nutrients acquisition (especially Phosphorus, Copper and Zinc) that results in improved overall plant growth.

Contains: Canadian Sphagnum Peat Moss (80-90 % / vol.)

*Dolomitic & Calcitic Limestone

***BIOFUNGICIDE™** (*Bacillus pumilus*, strain GHA-180)

*Wetting Agent

*Mycorrhizae – endomycorrhizal inoculum (*Glomus intraradices*)

Cheap soils at other stores contain weed seed and filler bark! This is for serious gardeners and really cuts down on your need to water.
