

Black Ripple Elephant Ears

Limited qty
available.

Colocasia esculenta 'Black Ripple'

- **Use:** We're in awe at the way light bounces off of each rippled leaf of this captivating Elephant ear, leaving a bold, reflective sheen. Given the slightest movement of air, dark-maroon undersides add yet another element of intrigue, supported by near-black stems. 'Black Ripple' is equally effective as a container plant on a sunny patio.
- **Exposure/Soil:** Sun– part shade. Provide well-drained, moist soil, but not soggy. Use a slow release fertilizer. The more water and fertilizer they get the better. Could grow in a well aerated pond.
- **Growth:** It makes a giant clump to 3-4' tall with a similar spread.
- **Hardiness:** 7b-10, perennial, mulch 1' around plant in fall
- **Foliage:** Puckered, dark chocolate leaves on strong, nearly-black stems .
- **Flower:** Not known for flowers.
