

Delphina Blue/white Delphinium

Stately and breathtaking. Magnificent dense racemes make delphinium excellent in the border and as a cutflower.

Delphinium 'Delphina Light Blue White Bee'

- **Use:** Delphina is easy to grow in full sun, and attracts butterflies as well as hummingbirds> Nibbling rabbits and deer leave it alone, and it makes excellent cut-flowers, whether fresh or dried. This sun-lover appreciates deadheading to stimulate rebloom. But be sure to leave the final flowers of the season on the plant, so it can self-sow!
- **Exposure/Soil:** Plant in part sun in our area, full sun up North. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers. If you are not good at watering we recommend using **Soil Moist**.
- **Growth:** Grows 20" tall and 1' wide.
- **Hardiness:** Zone 3-7b, May be treated as a reseeding annual in our area if super hot summer. So collect seeds or be sure not to mulch too heavy around the plant so seeds can sprout
- **Foliage:** Deciduous. Finely cut leaves.
- **Flower:** Big double blooms of soft powder-blue with a bold white bee (central cluster of petals). It blooms heavily in late spring and early summer, and then sometimes repeats!
