

Winter Sorbet Fragrant Wallflower

**Loves the cool
weather
months and
comes back
every year!**

Erysimum 'Winter Sorbet'

- **Use:** This is a new series of Wallflower that was specifically created by crossing many different species to give better plants, with more colours and longer flowering. These hybrid varieties bloom non-stop for months. The Winter series provides the largest plants with the biggest flowers. This selection from the series produces fragrant, lilac-purple flower spikes over bright green foliage. Plants are naturally compact and mounding, but pruning back by half after flowering is wise to prevent them from getting leggy. Wonderful for mixed borders, all containers and rock gardens.
- **Exposure/Soil:** Prefers full sun-part shade. Moist, well-drained soil, but not soggy.
- **Growth:** Grows 10-12" tall and wide
- **Hardiness:** Zone 7-9; Perennial; Will reseed.
- **Foliage:** Evergreen; Small long green leaves.
- **Flower:** Flowers with purple, yellow, pink and copper tones. This variety however, is earlier to flower, more compact with larger flowers.
