

Tugela Jewel Pineapple Lily

This new and unusual perennial will make a huge impact in your garden!
Received a 4/5 Stars in the UGA plant trials!

Eucomis comosa 'Tugela Jewel'

- **Use:** Kick up your heels and celebrate summer with this new perennial. Long lived and happiest when allowed to grow undisturbed for years. They get fuller over time, and the patches more dense, as the offsets from the mother bulbs mature. Pineapple lilies are sleepy in spring and slow to sprout, so don't get worried if they appear after other plants. Deer resistant.
- **Exposure/Soil:** Full sun, midday shade is appreciated in the hottest areas. Provide well-drained, moist soil, but not soggy. Use a slow release fertilizer. For the best performance plant where they'll receive little moisture in winter and spring, but average amounts in summer.
- **Growth:** Grows upright to 2' tall and 1 1/2" wide
- **Hardiness:** 7-10; Perennial
- **Foliage:** Deciduous. Beautiful deep purple-red foliage is darker when grown in full sun.
- **Flowers:** Every eucomis or pineapple lily is a delight with their lush foliage, and Dr. Seussian flower spikes! But The Tugela Jewel is special even among this group. New leaves emerge flushed with cherry red, slowly greening with maturity. Deep burgundy stems develop purple buds that open to a light, bright pink that shades to a rich burgundy with time. Ever changing and always beautiful!
