

Double Red Avenas

Geum flora plena 'Blazing Sunset'

- **Use:** UNBELIEVABLY LONG BLOOMING! If you have never tried Geums before, they're one of the toughest, heat tolerant and longest lived perennials you'll ever grow! Also known as Avenas, this offers a flash of hot colour for the early summer border. Grown for attractive hairy foliage and long blooming cheerful flowers in summer. Drought tolerant. Deer resistant. Attracts butterflies.
- **Exposure/Soil:** Sun– part sun, very easy to please. Appreciates some afternoon shade. Provide well-drained, moist soil, but not soggy. Use a slow release fertilizer.
- **Growth:** Moderate grower to 3' tall and wide. Clumps should be divided every 3 to 4 years in spring or fall.
- **Hardiness:** 3-8, Perennial. Reseeds
- **Foliage:** Deciduous. Plants form a low clump of coarse green leaves, with branching stems held above bearing medium-sized rounded flowers.
- **Flower:** Blooms like crazy late Spring thru Fall, even Winter in temperate climates (with dead-heading). Brightest red, 2.5" blooms look like ruffly roses & dance in the breeze on well-branched 2-3' tall stems, above sturdy, lush green, compact mounds

Red blossoms bring cheer to the garden.
