

Cloud Nine Switch Grass

Panicum virgatum 'Cloud Nine'

- **Use:** Different in that the large rose colored seed panicles envelop the upright bluish foliage; hence the wonderful 'cloud' effect. supplies an ideal wildlife habitat providing shelter and food for songbirds. Tolerates both wet and dry conditions. Switch Grass gets its name from the calming swishing sound produced with a gentle breeze. This tough ornamental grass is deer resistant, will grow near black walnut trees and even tolerates salt spray near the ocean and road salt.
- **Exposure/Soil:** Full sun– part sun. Drought tolerant once established. Needs at least 4 hours afternoon sun.
- **Growth:** Upright clumps 8 ft. tall, 4 to 6 ft. wide.
- **Hardiness:** Zone 4-9, Perennial
- **Foliage:** Deciduous. Lovely bluish foliage adorns this open airy perennial grass that never needs staking. Cut back to 1' tall in February.
- **Flower:** Fall brings golden tones to seed panicles and foliage for stunning winter interest.

Low maintenance, deer resistant, and drought tolerant!
