

# Variegated Needlepoint Ivy

## *Hedera helix 'Needlepoint'*

- **Use:** There are many selections of English Ivy, and all are useful evergreen groundcovers or climbing vines. This variety has small, dark green leaves. Often grown as a houseplant, but hardier than one might expect. Excellent in containers, mixed tubs, as a ground cover, or trained to climb on vertical surfaces.
- **Exposure/Soil:** Plant in partial sun, partial shade or full sun (but needs lots of water), in well drained soil. Prefers moist, but not wet soils. Tolerates drier soils in shade.
- **Growth:** Grows 4-6" tall and has an unlimited spread. ***The saying goes-The 1st year it sleeps, the 2nd year it creeps, the 3rd year it leaps!***
- **Hardiness:** 4-8, Perennial; Can also be grown as a houseplant.
- **Foliage:** Evergreen. Dainty, dark green leaves edged in creamy-white compared to other ivies.
- **Flower:** Not known for flowers.

Create an elegant Window box with this delicate ivy.
