

# Diva Lenten Rose

**A must  
have for  
every  
shade  
gardener!**

## *Helleborus x 'Diva'*

- **Use:** Free-flowering Christmas Rose Diva® enchants us with extra-large, slightly cup-shaped flowers from October onwards. Taking a closer look at an individual flower, you can make out a touch of pink in the stigma. The young flower buds are also a pale pink colour and match well with the reddish leaf petioles. The deep green leaves contrast beautifully with the pure white flowers. In the winter, Diva® is the ideal Christmas Rose for balconies and terraces and also makes an elegant decoration on gravesides.
- **Exposure/Soil:** Part sun-shade. Prefers acidic, (most of our GA soils are acidic) moist, well-drained soil, but not soggy.
- **Growth:** Grows 14-18" tall and 24" wide
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen, virtually problem free. Foliage is a handsome silvery-green.
- **Flower:** Free-flowering, with extra-large, outward facing, pure white flowers. Very early blooming.
