

Daylily 'Ming Toy'

Hemerocallis 'Ming Toy'

- **Use:** This variety is an excellent re-bloomer, meaning that it is known to produce several "waves" of blooms throughout the summer months, rather than just one heavy bloom period in early summer. Good numbers of blooms generally appear all throughout summer, and well into the early fall.
- **Exposure/Soil:** Full- part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Do not give too much nitrogen or they will not produce flowers. Once established needs only occasional water.
- **Growth:** Growing to a height of 18" and a plant spread of 12-24".
- **Hardiness:** Zones 3-9; Perennial
- **Foliage:** Semi-evergreen. We actually suggest trimming, or "mowing" the foliage back to a height of about 3 or 4 inches at the end of the fall season. This way, the foliage can have a fresh, new start when spring rolls around, and will look its absolute best all season long.
- **Flower:** Displays dark velvety red blooms with a golden yellow throat / center - blooms begin in late spring / early summer, and re-bloom throughout the rest of the summer season. Re-blooming can be further increased & encouraged through the removal of old, expired blooms & stalks (scapes).

Ming Toy has extremely bright, vivid colors held against grass-like foliage that is a nice dark green.
