

Midnight Rose Heuchera

An excellent addition to the shady garden or mixed container.

Heuchera x 'Midnight Rose'

- **Use:** Fabulous burnished black leaves are spotted hot pink in the spring, lightening in summer to cream and pink spots. Outstanding at close range for outdoor living areas and front entry foundation planting. Exceptional container plant for bold effects.
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Foliage reaches 10 in. tall, 16 in. wide; blooms reach 20 to 24 in. tall.
- **Hardiness:** *Zone 4-9*; Perennial
- **Foliage:** Semi-evergreen. Most noted for its dark purple to almost black leaves that are speckled with contrasting hot pink spots. Pink spots fade to cream as the summer progresses.
- **Flower:** Small, creamy white flowers borne in open, airy panicles appear in late spring to early summer on slender purple stems rising above the foliage mound to 24-30" tall.
