

# Pink Revolution Foamy Bells

## *Heucherella 'Pink Revolution'*

- **Use:** There have been a few pink-flowered heucherellas introduced, but none with THIS MANY FLOWERS and none with such attractive foliage. A one-gallon pot of Pink Revolution can have over 100 stems of magenta pink flowers at once! It is truly a blooming machine and will not disappoint once the blooms are gone because the deeply cut foliage will develop silver and purple markings as they mature each season, giving the plant multiple seasons of interest. Bees love heucherellas. Low maintenance and easy to grow - ideal for borders and mixed containers.
- **Exposure/Soil:** Sun– part shade (afternoon shade preferred in South). Best when planted under trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Grows 12-15" tall by 18-24" wide
- **Hardiness:** Zone 5-9; Perennial
- **Foliage:** Semi-evergreen. It also has a beautiful mound of bright green leaves with burgundy veins that make an attractive appearance all season long.
- **Flower:** In late spring, an abundance of adorable bubblegum flowers that cover the foliage.

Because of their low, mounding habit, they are often used as edging along paths or in containers. Try cutting a few of the tall flower scapes for fresh bouquets.
