

Brim Cup Hosta

Use as a ground cover, for edging, or as an accent plant in the shady border.

Hosta 'Brim Cup'

- **Use:** Introducing a hosta variety that has a quite unusual shape. Brim Cup is a new hosta that bears dark green, lightly corrugated leaves accented with wide, streaky white margins—a lovely coloration indeed! But Brim Cup's best feature is that the heart-shaped leaves form unique cups that one does not often see in hosta varieties. In midsummer, purple tubular blooms appear and give even the darkest spaces a well-needed jolt of color. Plant this beauty along shadowed walkways, in container gardens that can be moved around the property with ease, or in groups as a flowering ground cover. It perennializes like a dream, reappearing year after year with increased bloom and vigor. Butterflies love it!
- **Exposure/Soil:** Part sun (best)—shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Mature height of 1' tall and 1-1.5' wide.
- **Hardiness:** Zone 3-8; Perennial
- **Foliage:** Deciduous. Deep green, heart-shaped and cupped, lightly corrugated leaves with a wide white margin.
- **Flower:** In early summer, racemes of bell-shaped white flowers on 18" scapes.
