

Dwarf Red St John's Wort

Super fast groundcover for erosion control in difficult areas.

Hypericum 'Hypearls Compact Red'

- **Use:** Three-inch bright golden-yellow flowers burst open all summer long. Glossy blue-green foliage and a round-mounded habit make this an excellent border plant. Excellent for extreme slopes or sandy soils; spreads by underground stems; moderate drought tolerance.
- **Exposure/Soil:** Full-sun is best, although plants will adapt to partial shade. Too much irrigation or wet soils is not a good thing. A light trimming with the clippers in late winter (February) will encourage new growth in spring.
- **Growth:** Rapid growth to 18-24 inches tall and 16-18 inches wide.
- **Hardiness:** 6-10; Perennial groundcover
- **Foliage:** Semi-evergreen; Emerges chartreuse-bronzed, but quickly turns to medium green then dark green, with fall color being a deep blue-green
- **Flowers:** Bright canary yellow flowers that contrast with the dark green foliage. Each flower lasts one to two weeks. Three-inch bright golden-yellow flowers burst open all summer long and red berries follow.
