

Whiteout Evergreen Candytuft

Iberis sempervirens 'Whiteout'

- **Use:** An improved selection that brings more uniform flowering with dense branching that keeps this popular plant full from edge to center all season long. Masses of pure white flowers from early to late spring. Lovely when planted in mass for dramatic landscape effect. Deer resistant.
- **Exposure/Soil:** Sun– part shade. Provide well-drained, moist soil, but not soggy. Use a slow release fertilizer. Superb in borders, beds, and open woodland gardens.
- **Growth:** Grows 6-8” tall and 1-2’ wide or more
- **Hardiness:** Zone 5-10, perennial
- **Foliage:** Herbaceous, evergreen perennial and a floriferous selection for borders, rock gardens or for use as a groundcover.
- Cutting grown.
- **Flower:** Its low-growing, mounding habit complements the small, white, four-petal flowers that appear prolifically each spring.
