

# Ghost White Spotted Deadnettle

## *Lamium maculatum* 'Ghost'

- **Use:** Lamiums are a perfect deer resistant groundcover to brighten a partly sunny, semi-shady spot. A great performer. Attractive foliage. Not only is it an incredibly beautiful groundcover, but is even terrific at choking back weeds wherever it's planted. If you're seeking a uniquely colorful groundcover that maintains some color even during the winter months, Ghost Lamium is the perennial for you this year!
- **Exposure/Soil:** Prefers part sun to shade! Use slow release or water soluble fertilizer in late spring. Prefers to be kept moist and likes rich soil. Water under leaves and flowers for best results.
- **Growth:** This compact type grows 10-14" tall and plant 10-14" apart.
- **Hardiness:** Zone 4-9 Perennial.
- **Foliage:** Semi-evergreen; The leaves have serrated edges and tiny veins that are highlighted with various shades of green. The overall effect of your Ghost Lamium is of foliage that is a natural masterpiece in any setting.
- **Flower:** Produces a spring bloom of petite, purple blossoms that repeat throughout the summer. The effect of the tiny spots of lavender against the green edged, silver leaves is breathtaking!

**Use as a groundcover for cover shady banks. Also excellent used in containers.**
