

# Bandana Cherry Improved Lantana

## *Lantana x 'Bandana Cherry Improved'*

- **Use:** If you are looking for a tough plant it's hard to beat lantana. Lantana are heat tolerant, use little to no supplemental water in the landscape, will tolerate less than ideal soils and usually don't need to be deadheaded. If you are looking for a plant that will thrive on neglect, lantana is the champ. Useful as substitute for annuals in flower beds or containers. Attracts butterflies. Tolerates heat.
- **Exposure/Soil:** Full sun– part sun. Drought tolerant once established.
- **Growth:** Mounded form to 16-20" tall and wide.
- **Hardiness:** Zone 8b-11, Annual/ Tender Perennial. Mulch well in the winter. Do not cut back stems until April after winter is passed.
- **Foliage:** Deciduous. Green-lance leaves. Cutting grown.
- **Flower:** The large flowers clusters open a sunny yellow and fade to a deep cherry pink from late spring until fall. They are perfect for a full sun location in need of their tropical colors.

**Heat tolerant, drought tolerant, deer resistant, little to no need for deadheading, versatile, fragrant, attractive to butterflies and hummingbirds, what is there not to love?**
