

Paparazzi Levine Woodland Phlox

**Excellent
for shade
gardens.
Early
flowering**

and great heat and humidity tolerance for durability in pots and in the landscape! Great choice as a groundcover or accent planting.

Phlox 'Paparazzi Levine'

- **Use:** Feature fragrant, lavender-pink flowers with pale pink eyes and short, bushy, reddish stems with dark green foliage. Plants are noted for having vigorous growth, early flowering, a long flowering period and good resistance to powdery mildew. Once Levine is established it will be very drought tolerant. Phlox plants attracts hummingbirds, butterflies and bees. A long-lived, carefree native groundcover
- **Exposure/Soil:** Partial shade is best. Prefers moist, well drained soil, but is fairly drought tolerant once established.
- **Growth:** Grows 10-12" tall and wide. Plants will spread and can form large colonies over time.
- **Hardiness:** Zone 6-11; Will need protection from cold winds in our area.
- **Foliage:** Deciduous; Foliage is lance shaped and medium green.
- **Flowers:** Blooms of vibrant lavender dotted with a fuchsia eye. Burgundy stems and burgundy-tinted foliage are noticeable in spring. Early flowering with excellent heat and humidity tolerance. Fragrant and colorful too.
