**Polemonium ‘caeruleum ‘White Pearl’**

- **Use:** Polemonium are an excellent choice for many garden conditions. Bright flowering, attractive foliage, long lived and extremely hardy. Great for shady beds, borders and containers. Coarsely divided pinnate ladder-like leaves. Delightful elegant clusters of blossoms on upright stems emerge from attractive green ferny foliage.

- **Exposure/Soil:** Prefers part shade morning sun being best. Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. For a neat appearance, remove old foliage before new leaves emerge. Divide clumps every 2 to 3 years in early spring.

- **Growth:** Foliage mounds 15-18" high and 18-24" wide are stunning spring to frost.

- **Hardiness:** Perennial; Zone 4-8

- **Foliage:** Deciduous. The leaflets form opposite pairs along the stems giving a ladder effect hence the common name of Jacob's Ladder.

- **Flower:** Soft bunches of cupped-shaped white flowers in late spring–summer.

*Loves shade and is very easy to grow.*
