

Garnet Glow Calla Lily

**Super
easy to
grow!**

Zantedeschia 'Garnet Glow'

- **Use:** What may not be known about this plant is its adaptability. We have grown them successfully in a flower border along with other bulbs and perennials. The stems and the calyx are sturdy and long and therefore fit perfectly in bridal and exclusive bouquets. The average length is 60 to 70 cm and the vase life is at least two weeks. UPON PLANTING BE SURE NOT TO OVERWATER THEM FOR THE 1ST FEW MONTHS. ALLOW TO DRY OUT SLIGHTLY BETWEEN WATERINGS.
- **Exposure/Soil:** Part sun or at least 5-6 hours of sun. However, we have also had success with them in full sun and fairly shady locations also if the soil is good. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results.
- **Growth:** Grows 18-30" tall.
- **Hardiness:** 7-10 perennial
- **Foliage:** Deciduous. Rich green leaves speckled in white.
- **Flower:** In mid summer will have dark pink flowers with a lighter glowing center are quite lovely.
