

# Azalea Dorothy Rees

**Good for use in flower beds.  
Pure white snowy blossoms.**

## ***Azalea 'Dorothy Rees' (Robin Hill hybrid)***

- **Use:** Use it in bright woodlands or under tall deciduous trees. Combining with ferns and hostas completes a spring wonderland. The Robin Hills are a wonderful group of late-spring flowering azaleas grown for their large, showy, pastel-colored, funnel-shaped flowers and Satsuki Azalea-type form. These mid-size azaleas are best at the front of the border or in smaller gardens where many azaleas rapidly outgrow their space.
- **Exposure/Soil:** Prefers part shade and moist, well-drained soil, but not soggy.
- **Growth:** Vigorous mounding growth to a height of 2' tall and 4' wide.
- **Hardiness:** 6-9; shrub
- **Foliage:** Small evergreen leaves.
- **Flower:** Large 3.5" single shining white flowers cover this vigorous grower. Late season bloomer. Each blossom radiates with a slight green flush emanating from the throat.
