

# Gordo Boxwood

**Prune me, shape me any-  
way you want me!**

## ***Buxus hybrid 'Conrowe'***

- **Use:** A compact growing evergreen shrub that is similar in habit to other Korean Boxwoods such as Green Velvet. Gordo™ Buxus is a medium to slow grower with a subtle bloom, which attracts bees.
- **Exposure/Soil:** Sun to part sun. Only requires well-drained soil and prefers shading and wind protection in winter if grown on an exposed site. Tolerates some drought and will grow in dry soil but prefers well-drained, loamy, sandy or clay soils with a pH of acidic to slightly alkaline (6.8-7.7)
- **Growth:** Compact growth to 4 ft. tall and wide.
- **Hardiness:** Zone 4-8; Shrub
- **Foliage:** Evergreen; This particular variety also offers a somewhat larger more scalloped leaf, which requires minimal pruning and maintenance. Foliage keeps its rich green color through winter.
- **Flower:** Spring flowers are inconspicuous.
