

# Sunburst Boxwood

## *Buxus microphylla* 'Sunburst'

- **Use:** A great addition to the landscape with its showy golden variegation. A naturally dwarf, compact, and cold hardy Boxwood with a conical habit that lends itself to bonsai, dwarf hedging, and containers. The slow growing, durable shrubs are satisfying to grow and are well suited for spicing up the color theme in the garden while maintaining the classic applications of the genus.
- **Exposure/Soil:** Sun to part sun. Only requires well-drained soil and prefers shading and wind protection in winter if grown on an exposed site. Tolerates some drought and will grow in dry soil but prefers well-drained, loamy, sandy or clay soils with a pH of acidic to slightly alkaline (6.8-7.7)
- **Growth:** Moderate grower to 3 ft. tall and 3' wide, when unpruned.
- **Hardiness:** Zone 5-10; Shrub
- **Foliage:** Evergreen; The dainty oval foliage of this delightful evergreen is broadly edged in golden yellow.
- **Flower:** Spring flowers are inconspicuous.

Prune me, shape me anyway you want me!
