

# Crispii Hinoki False Cypress

Collector's  
plant!  
Excellent  
for  
adding  
interest to  
your  
garden!

## *Chamaecyparis obtusa* 'Crispii

- **Use:** Broad pyramidal; spreading branches; golden yellow foliage at ends of branches. Also excellent as a hedge, but we love them as a specimen plant in the garden to add architectural and color interest.
- **Exposure/Soil:** Full/part sun and could tolerate a fair amount of shade; Prefers well-draining soil and appreciates slow release fertilizer. Please amend your soil if you have red clay.
- **Growth:** Grows 25-30' tall and wide at the base in a pyramid shape.
- **Hardiness:** 4-8; Shrub
- **Foliage:** Evergreen. Golden crested sprays of leaves highlight any garden.
- **Flowers:** Not known for flowers.
