

Dwarf Japanese Cedar

Cryptomeria japonica 'Globosa Nana'

- **Use:** A superb selection that retains a neat, dense mound with little care. Enjoy as a single specimen or group as a filler.
- **Exposure/Soil:** Full sun /part shade; well-draining soil and appreciates slow release fertilizer. Somewhat drought tolerant.
- **Growth:** From 2-3' tall and wide.
- **Hardiness:** 5-9; shrub
- **Foliage:** Fine-textured foliage breaks up the bold effects of large-leaved plants. Foliage becomes rusty red in winter. Evergreen.
- **Flower:** Not known for flowers.

Great near the home
due to dwarf size!
