

Cleyera japonica

Loved for its red-dish new growth!
A common replacement for Red Tip.

Ternstroemia gymnanthera

- **Use:** Beautiful, leathery leaves look as though they've been polished! Attractive, basic landscaping shrub, informal hedge or container plant. Very tough and has many uses as a corner shrub, freeform foundation shrub, or as a semi-manicured hedge.
- **Exposure/Soil: Full to partial sun.** Prefers well-draining soil and appreciates slow release fertilizer. Water when top 3 in of soil is dry.
- **Growth:** Moderate grower to 6 to 8 ft. tall and wide, larger with age. Easily kept shorter however with pruning.
- **Hardiness:** 7-9; Shrub or Houseplant. We recommend you plant them on a protected wall away from extreme winter cold. We have had ours for 5 years, however, with no problems!
- **Foliage:** Evergreen; Glossy evergreen leaves.
- **Flowers:** Small yellow flowers are very fragrant.
