

Weeping Threadleaf Arborvitae

Thuja occidentalis 'Filiformis'

- **Use:** Also known as Eastern White Cedar. A very interesting and yet rare evergreen which features arching sprays of fine, thread-like bright green foliage on a mounding, haystack form, unquestionably distinctive, use as a solitary for effect or in the garden; needs shelter from drying winds
- **Exposure/Soil:** Full to part sun. During the winter they prefer well-drained soils. Water regularly, when top 3 in. of soil is dry. Once established needs only occasional water.
- **Growth:** Moderate growth to 7 to 8 ft. tall and 3 to 4ft. wide. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines.
- **Hardiness:** Zone 4-8 Shrub /Small tree.
- **Foliage:** Evergreen. Green foliage which emerges light green in spring. The threadlike leaves remain green through the winter.
- **Flower:** Neither the flowers nor the fruit are ornamentally significant.

Used for unusual texture as a specimen plant. Can also be used in pots around the home for a few years.
