

Kiowa Pecan

As a landscape tree Pecan trees provide filtered shade. Pecan nuts are useful in a multitude of recipes, or enjoy fresh nuts as a simple snack. The pecans can also be left to feed and nourish many types of wildlife.

Carya illinoensis 'Kiowa'

- **Use:** A medium to large nut that is very similar in appearance to the Desirable. The shell is medium to soft. Good quality, late maturing. Never plant pecan trees in areas where the sap will drip on patios, buildings, automobiles, and other surfaces. Best suited as a lawn specimen in full sunlight.
- **Exposure/Soil:** Grow in full sun. Well-drained, rich soil. Needs zinc fertilizer or crop will fail. Will fail in poor red clay soils. Fertilize pecan trees in late winter through early spring. RESEARCH IS NEEDED WHEN GROWING PECANS FOR CARE. See article by UGA online.
- **Growth:** The tree grows to a mature height of 60-80' tall x 60-80' wide
- **Hardiness:** Zone 7-10; Tree.
- **Foliage:** Deciduous. Glossy green leaves
- **Flower/ Fruit:** Large, soft shell and easy to crack. Self-fertile. Excellent nut quality. Late shedder. 38 nuts/lb
