

European Fan Palm

**Bring home the
tropics with this
winter hardy palm!**

We recycle empty pots and trays!

Chamaerops humilis

- **Use:** The curved, clumping, short trunks and gray-green, fan-shaped leaves, borne thickly in a bushy head, make a stunning sculptural element in a garden or patio containers. Attractive compact crown. Good garden or patio tree, effective near pool. Great container specimen.
- **Exposure/Soil:** Full to partial sun. Once established needs only occasional water. Does well in hot, sunny areas.
- **Growth:** Medium sized palm, usually reaching 4-5' in our climate. Clumping form. We still find it a good container plant at the pool!
- **Hardiness:** 7b-10, Shrub; Hardy to around 5°F, but will take some cold damage if temperatures fall below 15°F.
- **Foliage:** Large fan-like leaves make an attractive compact crown.
- **Flower:** Not known for flowers.
