

# Boston Fern

## **Nephrolepis exalata**

- **Use:** Boston ferns are one of the most attractive and admired foliage plants. They are often seen on shady porches during
- **Exposure/Soil: *Part sun-shade.*** Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Ferns love humidity. Just be sure to water in the mornings if possible. Water under the leaves as they hate being watered in the center of the plant.
- **Growth:** Will continue to grow in the basket.
- **Hardiness:** 9-11, annual, houseplant
- **Foliage:** Long fronds of deep green
- **Flower:** No flowers.
