

Hula™ Series Spreading Begonia

Begonia Hula™ Pink is a **Begonia interspecific variety**, commonly called **interspecific begonia** or **spreading begonia**. Hula is a highly branched spreading begonia that quickly fills landscape beds and containers. Daylength neutral, it is the earliest interspecific type to flower, covering its graceful cascades of lush, shiny foliage in masses of pretty pink blossoms from late spring to late summer, putting on a fabulous season-long show, which often lasts well into autumn.

Begonia interspecific ‘Hula Series’

- **Use:** Hula’s gorgeous trailing habit is perfect for tall mixed containers or hanging baskets, from which its arching stems can overflow and elegantly drape. But it is also beautiful in landscapes, where it blankets beds in brilliant color.
- **Exposure/Soil:** Sun-shade. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** Grows 6-10” tall and 20-27” wide, maybe taller if deep shade or rich soil. Use in patio containers, hanging baskets and beds
- **Hardiness:** Zone 9-11, Annual, Houseplant
- **Foliage:** Glossy, green foliage
- **Flower:** A multitude of flowers from spring to fall nonstop with little maintenance.
