Rex begonia offers colorful foliage and is one of the most interesting indoor plants around. Despite its exotic looks, Rex begonia is actually easy to grow. Because it's a relatively short houseplant,

Rex begonia is perfect for desks and tabletops where its wildly colorful, variegated foliage makes it a perfect contrast against other houseplants.

Begonia sp. 'Spirit Series'

- **Use:** This series offers eye-catching foliage in a range of exciting colors that can be enjoyed indoors as a houseplant or outside as temperatures rise. Rex Begonias (sometimes called Painted-Leaf Begonias) are native to the tropical and subtropical regions of India, and they thrive in highly humid environments. Don't overwater them, though, or they'll succumb to fungi. These slow-growers have highly unusual, striking foliage with large, brightly-colored leaves. Vibrant House plant that would wow anyone with their amazing array of colors. Perfect for windows and desks with bright indirect light! Also great for baskets or containers.
- **Exposure/Soil:** Performs well in part sun to shade. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Good drainage is a must. Likes high humidity.
- **Growth:** Grows 12-18" tall and 12-18" wide, maybe taller if deep shade or rich soil. Pinching tips and pruning outer stems in the growing season gives a bushier plant, good for hanging baskets.
- **Hardiness:** Zone 9-11, annual, houseplant. Bring inside in winter.
- **Foliage:** Depending on the variety, that may mean purple, pink, red, silver, or black.
- **Flower:** Graceful, white or pink clusters of blossoms on and off throughout the year.
