Calibrachoa "Superbells Yellow"

- **Use:** **FANCY, yet UNFUSSY.** By the time hard frost comes in fall, this plant will have showered your garden with thousands of blooms. The petite flowers grace cascading plants that are great in combinations, mono-hanging baskets and in raised beds with great drainage.
- **Exposure/Soil:** Loves full sun or at least 4-5 hours of afternoon sun. They love the heat! Water 2-3 times a week. Try to keep water off of the leaves. Requires well-draining soil and appreciates slow release fertilizer. Water regularly under the leaves. If you are not good at watering get some **Soil Moist**.
- **Growth:** Moderate grower 6-12" high and 20-30" trailing.
- **Hardiness:** Annual, Zone 9-11; Some people have luck with them coming back in the ground if mulched heavily in the winter. Will not come up until following May.
- **Foliage:** Dainty, green leaves.
- **Flowers:** Like waves of sunshine, compact, free-flowering Calibrachoa Superbells® Yellow produces lots of bold flowers that combine well with blues and purples for a look you'll enjoy all season long until fall frost.
