

XL Blue My Mind Blue Daze Basket

Evolvulus glomeratus 'Blue My Mind XL'

- **Use:** True blue flowers are never easy to find, but the truly difficult endeavor is finding true blue flowers on very heat tolerant plants. Blue My Mind® XL Evolvulus is the equivalent of hitting the jackpot. True blue flowers, loves the heat and blooms all summer long. Blue My Mind® is perfect for creating containers and can be a great garden plant, but it has a hard time keeping up with other plants in combinations. Blue My Mind® XL is more vigorous so it will keep up well with other moderately vigorous plants. If you are planting a combination recipe, that vigor is needed. If you are planting just evolvulus, the original Blue My Mind will give you the best color show.
- **Exposure/Soil:** It will perform best in full sun and needs to be protected from even light frost. It is drought tolerant, once it is established. Plants do need to be watered well for several weeks during root establishment. While the plants can withstand drought conditions, growth and flowering are better with consistent moisture. Deadheading is unnecessary.
- **Growth:** Moderate grower to 6-12" tall and 2' wide.
- **Hardiness:** Zone 9-11, annual or houseplant
- **Foliage:** Soft fuzzy leaves. Cutting grown.
- **Flower:** Thousands of sky blue flowers non-stop from spring to fall. It is our favorite annual!! This variety does not close up in the evening like other cultivars.
