

Sunfinity Sunflower

A favorite of children!

Helianthus annuus 'Sunfinity'

- **Uses:** Sunfinity is a free-branching and blooming sunflower that is truly unique from any other annual sunflower on the market. Perfect for cutting for indoor arrangements.
- **Exposure/Soil:** Full sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Prefers not to be overwatered.
- **Growth:** Ultra dwarf sunflower. 3-4' tall and 2-3' wide.
- **Hardiness:** Zone 9-11, annual, May reseed.
- **Foliage:** The foliage is a handsome rich, dark green so intense it looks black from a distance. The plant branches young and sets numerous buds on its side shoots, giving you more blooms than you might think possible.
- **Flower:** Infinite beauty from plants that grow so quickly, your garden or patio will be filled with sensational sunny color 3-4" blooms before you know it! Spectacular as a cut flower, too. For best branching, pinch off the main stem above the fourth or fifth pair of leaves as it's growing.
