

Sol Seeker™ Series

Honey

Bronze Burst

Bee Yellow

Golden Nectar

Lovely as
cutflowers!

Helianthus annuus 'Sol Seeker™' Series

- **Uses:** Large, well-branched plants in the series boast large sunny blooms, continually, all summer long. A deep root system imparts impressive heat and drought tolerance, as well as rapid establishment for maximum gardening success.
- **Exposure/Soil:** Full sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Prefers not to be overwatered.
- **Growth:** Grows 36" tall and 20" wide.
- **Hardiness:** Zone 9-11, Annual, May reseed.
- **Foliage:** The foliage is a handsome rich, dark green. The plant branches young and sets numerous buds on its side shoots, giving you more blooms than you might think possible.
- **Flower:** Masses of large sunny flowers with brown-black centers. Delivers multiple blooms throughout the summer on multi-branched stems. Ripe flowers-seeds are beloved by birds, especially yellow finches.
