

Solarscape® Impatiens

Looks great when massed in beds and borders and since it was trialed in both containers and in-ground, we know it does well in both. Try Solarscape for a showy display in your garden!

Impatiens x hybrid 'Solarscape Series'

- **Use:** The high-performance varieties in the Solarscape® series grow well in sun or shade and fill in quickly. It has a mounded habit of dense foliage with superior disease resistance, especially to impatiens downy mildew. It is shown to best effect when massed in beds and borders or in containers and hanging baskets. It is a great option for brightening areas with dappled sun, such as around the base of smaller trees.
- **Exposure/Soil:** Plant in full sun to shade (better blooms in more sun). Water regularly, when top 3 in. of soil is dry, don't let them dry out. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** Grows 11-13" tall and 18-20" wide, maybe taller if deep shade or rich soil. Use in patio containers, hanging baskets and beds.
- **Hardiness:** Zone 9-11, annual, houseplant
- **Foliage:** Green oblong leaves
- **Flower:** Nonstop color from late spring until fall frosts. Assorted colors are marked on the pot.
