Ipomea batatas 'Sweet Caroline Series'

- **Use:** Great foliage component plant in combinations; excellent heat tolerance and good vigor. Our interest in these Sweet Potatoes is not in the edible roots but in the attractive foliage of our two ornamental varieties. Their large and colorful leaves cascade from containers in a seemingly endless stream all summer long, and their trailing habit makes them equally useful as striking, short-term ground covers or as skirts for upright plants.
- **Exposure/Soil:** Plants thrive in full sun or partial shade with consistent moisture. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Super fast grower trails only 6-12" tall and 18-30" wide.
- **Hardiness:** Zone 9-10 ; Annual in this zone unless you dig up the potatoes and store them in the garage over winter.
- **Foliage:** Color foliage available in multiple colors in this series add a perfect foil for flowers and grasses.
- **Flower:** Not very noticeable flowers.

Did you know that we recycle empty pots and trays?
