

# Melampodium

## *Melampodium divaricata* 'Derby'

- **Use:** Quickly becoming the summer annual of choice for gardeners who value its low-growing, neatly-rounded habit, effortless summer-long bloom, and versatility of use! Great for containers, edging, the front of the border, pattern plantings, and just about any other site in sunny soil.
- **Exposure/Soil:** Sun- part sun. Easy to grow in average soil with average moisture but will tolerate drought. Fertilize every two weeks with a light general fertilizer.
- **Growth:** Grows 10-12" tall and wide
- **Hardiness:** 9-11, annual, houseplant
- **Foliage:** Small scented green leaves.
- **Flower:** A multitude of small yellow daisies from spring to fall make this one of the landscape plants for high impact color! No need to dead head blooms!
