

Shockwave Petunia

Bold 1 1/2- to 2-inch blooms simply cover the mounded, spreading plant, beginning in mid-spring and continuing into fall.

Petunia sp.

- ***Use:*** From the ever-popular Wave series of Petunias. ***Smaller flower than the Wave Petunia, but still the great trailing habit.*** These petite-flowered, mounded plants perform equally well in small spaces, containers, flowerbeds, and mixed combos. Very heat-tolerant and well-branched. Loved by hummingbirds.
- ***Exposure/Soil:*** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results.
- ***Growth:*** Grows 8 to 10 inches high, 2 to 3 feet long.
- ***Hardiness:*** 8-11 Annual, Many people have success with them reseeding and coming back every year.
- ***Foliage:*** Deciduous. Pinch back tips occasionally for a super bushy plant.
- ***Flower:*** The extreme proliferation of small trumpet shaped flowers delivers the strongest colour shows. Self-cleaning plants stay flower-filled to deliver the best-looking outdoor displays.
