## *Petunia 'Supertunia Silver'*

- **Use: Like me NOW? Just wait 'til I GROW UP.** Supertunia Trailing petunias are very strongly trailing, with very little height. They will function as spillers in containers, but are also good as front-of-the-bed plants for landscapes. If your goal for hanging baskets or window boxes is to have the plants be as long as possible, Supertunia Trailing is the best choice. They have small flowers.
- **Exposure/Soil:** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results.
- **Growth:** So in a garden bed, border, or landscape feature we grow 4-12 inches tall, and spread w-a-a-y out. As much as 3+ feet. You want to fill an area with wall-to-wall flowers all season? I'm your plant. Hanging baskets, window boxes, patio containers, same story.
- **Hardiness:** Zone 10-11 Annual,
- **Foliage:** Deciduous. It's pointy leaves remain green in color throughout the season.
- **Flower:** This very floriferous petunia is something a gardener dreams of for their garden. This long blooming and lightly fragrant petunia blooms from spring until frost even during a drought. And the color is something new in the Supertunia family of plants with white flowers tinged with purple veins and a purple eye.

You know what else is  
totally wicked? I'm disease resistant, self-  
cleaning, and have sturdy stems so I always  
look good.
