

Endurance Marigold

Sunset Gold

Mlx

Orange

Yellow

Marigolds are a great companion plant for pretty much all garden plants, blooming or edible. Their roots contain thiopene which is toxic to certain nematodes. Plant marigolds around the outside of your garden to discourage aphids and beetles from stopping by for and all you can eat smorgasbord.

Tagetes erecta 'Endurance Series'

- **Use:** Everlasting garden performance. Next generation in triploid breeding — F1 African x French Marigold brings the absolute best of both worlds! Extra large double flower on a compact French Marigold habit. Exceptionally quick finishing allows for a nearly African-sized flower with nearly French Marigold timing. Heat tolerance and sterility combine for unsurpassed garden performance, providing masses of blooms all-season long. Additionally, marigolds will also attract beneficial insects that will snack on the insects that are feasting on your plants. Beans, carrots, cabbages and tomatoes are just a few plants that benefit from having marigolds as a companion plant.
- **Exposure/Soil:** Full sun or at least 5-6 hours of afternoon sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** The compact plant size—just 10 to 12 tall and 8 to 10" wide.
- **Hardiness:** Zone 9-11, Annual, Houseplant
- **Foliage:** Its fragrant ferny leaves remain dark green in color throughout the season.
- **Flower:** Glorious flowers with exceptionally large 3" blooms dazzle with a luscious palette of yellow, orange or sunset gold. They hold their doubleness and shed water well from summer until fall.
