

Glory of the Snow

size 5/ + cm

Chionodoxa luciliae

- **Planting density:** 2-3 inch apart, 10 per sq. ft.
- **Planting depth:** 5 inches to base of the bulb.
- **Best planted in a mass of 60 or more for dramatic effect.**
- **Use:** Sometimes called 'Glory of the Snow'; 5-10 small starry flowers in a spray per stem; great naturalizers in rock and woodland gardens or in lawns; 'shoes and socks' plant for larger daffodils, tulips and hyacinths; late winter/early spring; Seeds itself freely to create lovely carpets. Great with early Narcissus, such as 'Tete-a-Tete'. Deer resistant.
- **Exposure/Soil:** Full-part sun (does best with some afternoon shade). Moist, well-drained soil, but not soggy.
- **Growth:** Grows 6-10" tall.
- **Hardiness:** Zone 3-8. Perennial. Bulb.
- **Foliage:** Deciduous.
- **Flower:** These delightful sky-blue blooms with white centers are perfect for rockeries, borders, under trees and shrubs. They're the first of the springtime blooms to peek their heads through the snow.
