

Picotee Amaryllis

Comes back every year
and very easy to grow!
Sells for over \$20 in
bulb catalogs!
We pride ourselves in
selling larger bulbs
than the box stores that
will produce more
stems and flowers.

Hippeastrum 'Picotee'

- **Use:** The shapely blooms and rich, iridescent colors of Amaryllis light up a cold day like nothing else we know. They bring joy and wonder in the short days of winter.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry. Drought tolerant when established, but prefers moist soil, but must be well-drained.
- **Growth:** Stems grow 1-2 feet tall. The bulb will send out more stalks of flowers and grower larger over time. Too much water or low light can cause stems to elongate.
- **Hardiness:** Zone 7-10 ; Perennial; Herbaceous. (it is claimed that they are cold hardy down to zone 6) In zones 7 and below, we recommend deep planting (up to 4 inches of soil above the bulb) and a thick winter mulch.
- **Foliage:** Deciduous. Long, strap-like leaves.
- **Flower:** Crisp white petals, with edges finely penciled in rich red, present a clean, tailored look that's utterly distinctive. This choice variety is heavy blooming, unusual, and always in short supply. Allow 8–10 weeks from bulb to bloom.
